Maintaining a small class size ensures intensive, individualized instruction and supervision, allowing students	2027 Fall	The proposed course is essential for expanding our curriculum to meet growing student interest in food science and technology while supporting transfer to local university programs. By integrating scientific principles with hands-on applications, the course will develop students' critical thinking and

		<p>to develop scientific and technical skills effectively. Close oversight is also essential for maintaining student safety and adhering to mandated sanitary standards in a laboratory setting.</p>	<p>problem-solving skills in areas such as food chemistry, microbiology, and safety. It will serve as a required course in the new Food Science and Technology Certificate and Associate in Science degree, equipping students with the analytical and practical skills needed for academic and professional success in the field. The program addresses the ongoing demand for skilled professionals in the food industry. Nationally, the Bureau of Labor Statistics projects a 7% growth for agricultural and food science technicians and an 8% growth for agricultural and food scientists from 2023 to 2033, which is slightly faster than the average for all occupations. In California, the employment of agricultural and food science technicians is projected to grow by 9% from 2020 to 2030, while food scientists and technologists are expected to see a 16% increase as well.</p>
--	--	--	--

					<p>This growth is significantly higher than the national average, reflecting California's strong presence in the food industry. In Orange County, job growth is projected to be 5% for food science technicians and 4% for food scientists and technologists through 2027, according to the OC Center of Excellence. These projections highlight the favorable job market for graduates in this field. Proposed for Cal-GETC Areas 5A and 5C. Proposed for AA GE Area 5.</p>
